

ELITE SERIES

Balmoral Custom Interior Doors

BALMORAL LUMBER & MILLWORK

Exclusive to Balmoral Lumber and Millwork, the Elite Series interior door is constructed with quality and value in mind. These stunning doors are the perfect addition to any budget conscious project. The solid core strength, seamless face and solid wood mouldings make an interior door that is attractive while being functional and durable.

With eight elegant designs, the Elite Series doors also offers the ability to specify details like stile/rail widths and heights making this door one of the most versatile affordable doors on the market.

Choose from four standard solid wood moulding designs and four panel designs to create the look that is right for your home or business needs. Balmoral also offers you the option of creating your own personal flavour with custom moulding profiles designed by you and machined in house.

Each elegant Elite Series door is constructed using the highest quality Hardboard that's carefully buffed for a visually appealing, smooth finish. Once painted, these doors share the same appearance and durability as a solid stile/rail door.

How to Build Your Elite Door

Step 1 - Select the Elite door style that works best for your application. Determine what sizes are required for the project. (sizes up to 36" wide and heights up to 108" tall available.)

Step 2 - Select the solid wood moulding design that compliments your door layout and trim choices.

Step 3 - Select the 1-1/8" profiled or 3/8" flat panel design that compliments your door layout and moulding choices. Choose specialty glass to make the perfect french door design.

*All Elite Series doors come UN-PRIMED
