

Exclusive to Balmoral Lumber and Millwork, the Designer Series interior door is constructed to compete with the more common semi-solid door. These stunning doors are SOLID CORE constructed, priced to compliment any budget conscious project. The solid core strength, seamless face and solid wood mouldings make an interior door that is attractive, functional and durable all at the same time.

Eight standard elegant designs, consistent measurements creating the perfect looking door EVERYTIME. Unlike our competitors doors, your door handles will always be centered in the style. Its details like this that set the Balmoral Designer door apart from its competition helping make this door one of the most versatile affordable doors on the market.

Choose from four standard solid wood moulding designs to create the look that is right for your home or business needs. Balmoral also offers you the option of creating your own personal flavour with custom moulding profiles designed by you.

Each Designer Series door is constructed using the highest quality Hardboard that is carefully buffed for a visually appealing, smooth finish.

### How to Build Your Designer Door

**Step 1** - Select the Designer style that works best for your application. Determine what sizes are required for the project. (sizes up to 36" wide and heights up to 108" tall available.)

**Step 2** - Select the solid wood moulding design that compliments your door layout and trim choices.

**French door option** - Select the optional moulding and glass design used to create a french door that compliments your interior doors.
